

May 23, 2017

To whom it may concern:

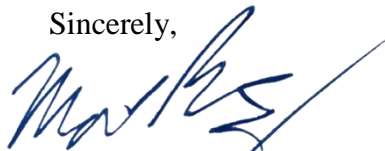

My name is Matthew Ramsey and I am an Assistant Professor in the Department of Cell and Molecular Biology at the University of Rhode Island. It is my pleasure to recommend Patricia Meade for her Veterinary school applications. Patricia was a student in my CMB211 – ‘Introductory Microbiology’ course in the spring of 2017.

Patricia finished in the top 10% of my course (of 73 students) with an A grade. In a class this large, it’s somewhat difficult for me to get to know many of the students. Despite this, Patricia quickly established herself as a very willing and eager participant in class, attending every lecture that I can recall as well as all of my voluntary exam review sessions.

Most of the students in this course only tend to approach me outside of class if they are doing poorly on an exam. Patricia did quite well from the start and despite that still came to office hours to ask about course material and more complex topics that were merely hinted at in this introductory course. I feel that Patricia has a genuine curiosity and interest in science and has a great mind for it.

Through office visits, I got to know Patricia a little better and am impressed with her level of social skills and attitude, especially for her age. I am confident that she will be quite successful in whatever path she chooses to pursue and that if she were accepted to Veterinary school, she would do quite well. Whatever you decide, I am sure that Patricia will be successful and I look forward to seeing her progress beyond her time at our University. I recommend Patricia without reservation and I hope you agree.

Sincerely,

Matthew Ramsey
