

### Anticipated Budget List

- Custom Primers for PCR: \$100
- Sequencing: \$250
- Specialized Growth Media: \$250
- Enzymes for Molecular Biology: \$100
- Gloves, pipette tips, tubes, electroporation cuvettes, and disposable cuvettes: \$500

**Total: \$1,200**

Primers will be used during the PCR. The specialized growth media will be used during the transformation. The enzymes will be used throughout the project, as will the gloves, pipette tips, tubes, electroporation cuvettes, and disposable cuvettes. The sequencing completed in the Rhode Island INBRE Molecular Information Core and will confirm if the desired DNA was correctly inserted.
